O-oh, oh so lonely / for years my life's been oh so lonely
 but when you came into sight / you brought a few things - that's what I like
 O-oh, oh so lonely / for years my life has been oh so lonely
 but what happened just the other night / it changed a few things, it changed all of my life

Wasting my time on all other guys / was tasting sweet, for only one night
 say my name and I just want to be with you
 Chasing lights, they 're moving from me / all those nights, where I used to be
 Monday morning / it is all gone

I know you won't stay / but you'll remain a friend anyway
 I know that you won't stay / but it certainly won't matter today
 O-oh, oh so lonely / for years my life has been oh so lonely
 but when I swiped to the right / it changed a few things, it changed all of my life

A love song, that's what we are / a love long song, reaching the stars
 say my name and I just want to be with you
